PROFESSIONAL SUMMARY

Cloud Systems Administrator with hands-on experience across hybrid infrastructures (VMware, AWS, OpenStack) and automation frameworks (Ansible, Jenkins, Python). Proficient in implementing Defense-in-Depth strategies, patch management, and infrastructure monitoring (Zabbix, Grafana, Prometheus). Experienced in storage clustering technologies (Ceph, GlusterFS, NetApp). Currently pursuing AWS Cloud and CompTIA Cloud+ certifications to advance into a **Cloud Engineer** role.

WORK HISTORY

SYSTEMS ADMINISTRATOR 03/2025 to Current

GE Vernova Project (Via Sogeti), Melbourne

- Lead RHEL 8 and Oracle Linux 7 patch orchestration across VMware and bare-metal infrastructure, automating compliance with Ansible and Python/Bash scripts reducing patch windows by 25%.
- Administer VMware vSphere/ESXi clusters, coordinate VM migrations, and administration.
- Manage NetApp and GlusterFS storage nodes, optimizing replication, optimizing I/O and improving failover recovery by 10%.
- Maintain Zabbix, Prometheus, and Grafana dashboards for real-time visibility and alerting.
- Perform kernel-level debugging and root cause analysis for Linux and Windows fleets.

SYSTEM ADMINISTRATOR 09/2023 to 03/2025

Atlantic.Net, Orlando

- Deployed scalable Linux/Windows systems with network storage, reducing infrastructure complexity and improving reliability by 40%.
- Conducted vulnerability assessments using OpenVAS and Nessus; led incident response for 1200+ VMs.
- Managed pfSense/OPNsense firewalls, IDS/IPS systems, and VPN configurations.
- Delivered patch management aligned with GDPR, PCI DSS, and HIPAA compliance.
- Authored documentation improving staff efficiency and reducing resolution time by 30%.

HELP DESK TECHNICIAN 12/2022 to 09/2023

Atlantic.Net, Orlando

- Provided remote support to 1200+ users across Windows/Linux environments with 90% efficiency.
- Reduced resolution time by 20% using Jenkins and automation tools.
- Supported virtualized and containerized environments (VMs, Docker, SIEM servers).

EDUCATION & BACKGROUND	Faculdades Integradas De Itapetininga, Brazil Juris Doctor, Logic, compliance, and analytical reasoning foundational for security and regulatory alignment in IT.	
CERTIFICATIONS	• CompTIA A+, 2022 • CompTIA Security+, 2023 • Microsoft SC-900, 2024 • WHM Administration, cPanel Certified Partner Accreditation • CompTIA Cloud+, In Progress, 11/2025 • AWS Cloud Practitioner, In Progress, 12/2025 • <i>Planned next steps: AWS Solutions Architect.</i>	
PROJECT	Personal Portfolio Website using Flask + Docker on AWS EC2 instance with Nginx reverse proxy and Let's Encrypt SSL. Password Manager (Tkinter Desktop App + Encryption + MFA). Backup Automation to AWS S3 – Created a Bash backup script that syncs EC2 and Docker VM backups to AWS S3 using AWS CLI and timestamped directories. Automated retention, rotation, and reporting logic with environment variables and integrated GitHub Actions for periodic validation.	
SKILLS	• Virtualization (KVM, OpenStack, VMWare, Hyper-V) • Firewall (Fortinet, pfSense, Opnsense, UFW, nftables, iptables) • Cisco/Juniper Switches • Ceph GlusterFS, NetApp ONTAP • Python, Flask • GitHub / GitHub Actions • Windows Server 2016-2025 • Ubuntu 22 and 24.04 • AWS (VPC, EC2, S3, IAM, Lambda, SNS, CloudWatch) • SIEM / Monitoring (Wazuh, Prometheus, Grafana, Zabbix) • Suricata, Snort IDS/IPS • Vulnerability Scanner (OpenVAS, Nessus) • PowerShell / Bash Scripting • Jenkins / Ansible • Oracle Linux 7, RHEL 8 and 10 • WHM & cPanel Adminstration
